

Gloskil

Additive
CONVENTIONAL

Always test ink on substrate prior to production run. Please refer to the MSDS for safety precautions.

Description: The Gloskils are a flattening agent that has already been incorporated into a liquid. Therefore, no particulate material will be released into the air. The additive also has the added benefit of improving leveling, flow, and definition.

Qualities:

- Flattens Inks
- Improves Flow
- No Particulate material
- Improves Leveling
- Ease of Application
- Compatible with most of Deco Chem's Ink

Mixing: The Gloskil is so concentrated that some ink systems may require no more than 5% to achieve a dead flat. A high gloss ink may require 10 to 12%. **Some thinning may occur with the addition of Gloskil 3102, so we recommend adding Gloskil 3102 prior to thinning.**

Compatibility: The Gloskil 3102 may be used in virtually any ink or coating system.
