Deco-Chem Ink News

Glass Decorating Edition

Glass is a fragile medium, but it can carry a powerful message and be of great utility! The transparency of glass, on its own, allows a unique interaction between light and the chroma of the ink. We have tried to create inks that utilize that special property of glass, and at the same time, emphasize it's functionality and durability. For more information on what we can offer call Matt Doorn, Dwight Davis, or myself, Brent Davis.

October 1, 2006

The first five people to find the hidden ink spatula ——— and call Ali or Matt with the location will receive a $25 gift certificate to Wendy's, Friday's or Olive Garden. You will then be qualified for the grand prize drawing. The grand prize is listed below for the drawing on December 17, 2006.

One per company per month please. *Good Luck!*

Congratulations!.....to the five contest winners in the last issue. There were 2 for Olive Garden, 2 for Wendys and one for Friday's. All callers who have questions about items in the newsletter will be included in the December drawing.

Grand Prize

$300 IN COLD HARD CASH!

UV SUBLIMATION BASE

DRM-11001 can be screen printed as a base for sublimation ink. Even a very thin layer can produce the desired effect. Both white and clear are available. 888-DECO INK

Heard on the street.....

Why do witches use brooms to fly on?
Because vacuum cleaners are too heavy!

What do ghosts add to their morning cereal?
Booberries!

What did one ghost say to the other ghost?
Do you believe in people?

For screen printing on glass

THERMOCHROMIC INKS

Send us your temperature

This "beveled-looking glass panel" has been screen printed with a Simulated-Bake Etch to make it appear like glass etched with hydrofluoric acid. Ask for 4449 Simulated Etch.

UV Mirror Etch Resist

Screen print your design on the back of mirrors with MER 9091 to selectively remove the mirrored coating and reveal clear glass. Call for procedure details. 800-348-7191

SandBlast effect will give the look of having been etched with the force of air and sand

SANDBLAST

The unique combination of textures gives the feel and look of sandblasting.

UV Primer for Glass

D-10244 is a clear primer that adheres to glass and acts as a base for other colors. It is screen printable and roll coatable, and will accept sublimation inks. Many decorative applictions! 888-DECO INK

SS-20 Chrome can be screened on flat or three dimensional glass for an eye-popping effect!
