

# Deco-Chem Ink News

The color on a metal nameplate gives the aesthetic "POP" and also communicates. But both primers and overprint clears can lend functionality over and above what the color may contribute. That is why we are focusing on clears in this issue. We have many that are not listed here. So send those special clear projects to Matt Doorn, Dwight Davis, or myself, Brent Davis. 888-DECO INK (332-6465) All of us wish you the Merriest Christmas and a prosperous New Year!

*Brent Davis*, President

December 1, 2006

**The Winner...**  
.....Of this years  
**"FIND THE SPATULA"**  
drawing is: **Nick Moon**  
*Nick is the Process Development Engineer at the Kentucky division of ANGELL-Demmel. We would like to thank everyone who participated. Watch for new games in next years newsletter.*

**HARD COAT CLEAR**

MBI Hard Coat Clear produces an extremely hard and durable surface. It is most useful when scratch and mar resistance is desired. Because of it's hard surface, the clear should be limited to a shallow forming radius. Use for DRY ERASE also.

**Electronic Newsletter Coming**

In the first quarter of 2007, we will introduce this newsletter in an E-mail format. It will allow us to give you industry information, provide links to other document and encourage feed back. If you would like to start receiving our new electronic newsletter, please send your e-mail address to: [dneil@decochem.com](mailto:dneil@decochem.com) or call Ali at ..... 800-348-7191

**METAL PRIMERS**

**4502 Baking Primer**  
Hybrid urethane primer used in the automotive industry for overprint with ATB colors and dome.

**4720 Baking Primer**  
Epoxy hybrid used as a general purpose base for auto and appliance applications. Excellent Formability and chemical resistance.

**D-10244 UV Curable Primer**  
This primer will accept a variety of UV curable inks as well as standard solvent based inks. It also works well as a base for sublimation inks.

**MetaFlex Plus**  
**DEEP DRAW**

MetaFlex chemistry is one of a kind. You get great chemical resistance, physical properties and yet have the ability to deep draw your part.

**MATTE UV CLEAR FOR ALUMINUM**  
This DecoRad clear can give you a six gloss on a 60 degree glossmeter. Along with that you get excellent flexibility, chemical resistance and top of the line weatherability.

**HEAT RESIST**  
Screen Ink For Range Panels and Grills

The Deco-chem High Build clear for nameplates and appliance panels, tinted with X-act toners, can yield visually interesting and tactile patterns.

*Textures of all kinds...are available to stimulate the tactile and visual senses. Let us know your application. We may have a texture for you!*

**X-ACT**

You can inventory five different baking enamels with just one set of twelve concentrates. Why? Because the concentrates are compatible with all five line "Letdown" clears. You choose the properties you need from the 5 "Letdown" clears.

**Top Printer**

Just as clear as a Christmas morn  
Deco-Chem's 4719 Acrylic Urethane Clear is filtered through a 5 micron bag, and then tested-tested-tested. It is the quality you must have to meet the competition head-on!

**FILL ER UP..... AND THEN SOME!**

Our Total Solids Clear is a special baking clear that contains no solvent. Great for Etch & Fill and zero solvent emissions.

**POLYON**  
Don't get eaten by the polar bear!

POLYON was formulated to minimize solvent emissions and still have the good properties consistent with conventional bake systems. Polyon does not dry in the screen, therefore, giving the printer plenty of "open time."  
888-DECO INK

**JUST DEVELOPED**

A New Baking Black has been formulated for the LOXON line. Get the summary for benefits.

A new modified epoxy clear has also been introduced. It has excellent flow and leveling.

**DECO-CHEM INCORPORATED**
