UV Flexo White

In today's fast changing world, it is difficult to know the current needs of our customers'. But there is someone who does know and that is you the customer. With your help we hope to improve our capabilities. Just let us know the products that you manufacture, your "want" list, and where you think your industry is headed. Each participant will receive a discreet summary of what we learn. For further information on items below, please call Matt Doorn, Dwight Davis, or me, Brent Davis.

Brent Davis —Vice President

If you wish to be removed from our newsletter list, please call 800-348-7191

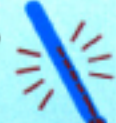

August 1, 2006

The first five people to find this ink Spatula  and call Ali or Matt with the location will receive a \$25 gift certificate to Wendy's, Friday's or Olive Garden. Your name will then be tagged for the grand prize drawing. The drawing will be December 17, 2006.

Good Luck!

One per company please.

Thermochromic Inks

For plastics, paper, ceramics, glass-ware and metal.  Product promotions, anticounterfeit, temperature indicating and warning. We have formulated this product for several surfaces for flexo printing and screen printing.

Writable Clears & Colors

(And printable)

Deco-Chem's writable clears & colors, will accept ball point pen, and digital printers with a nice clear edge.

UV Curable

Wet Lamination Adhesive

For bonding Cold Foil films to papers and some film surfaces. 4530 is printed directly on the label and UV cured through the metallic cold foil. Call Tom Brough at 336-337-2802 or Deco-Chem.

Easy Blending System for UV

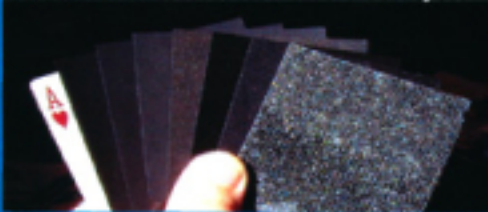

We have developed a universal blending system that will work in Free Radical UV Clears. The system could be of great help to anyone who works with UV inks. Please call Ali and request the detailed brochure pictured here.

GLOW IN THE DARK

UV Flexo Inks That Will Come Alive When You Turn Out The Lights!

Textures for UV flexo and rotary screen — Tactile feedback and appearance.

RSF

Silicone Free Rotary Screen

If you print rotary, you must try RSF UV Screen White. The results are an exceptionally smooth surface. That yields excellent trapping, whether overprinted with screen or with flexo. Testimonies available if non-com.

ALL UV FLEXO WHITES ARE

NOT THE SAME!

We'll prove it! Order one gallon of 7969 UV flexo white. If it's not the best white you've ever seen, we will refund your money! Double Dare ya!

DCF is truly the most versatile and dependable UV Flexo ink on the market today. Brilliant concentrated colors, excellent trapping, no

DCF UV FLEXO

cavitation, and economical. We will match your color or you can blend your own.

Call today to get better acquainted with this great product.
